

AEOMED

Loess occurrences and dust additions to current surface soils and palaeosols in Mediterranean climate

1st Workshop: Mediterranean palaeosols: evidence of the continuous interplay between climatic and event driven pedogenesis, with a special focus on the role played by dust inputs

Firenze, 10-12 October 2012
The Natural History Museum,
Via La Pira 4

The workshop aims to prime a research network. It will start with a session on state of the art and knowledge needs on Mediterranean loess. A field trip will demonstrate loess-influenced soils in central Tuscany

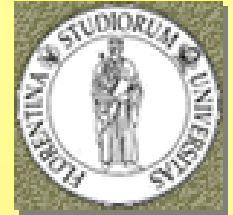

An INQUA TERPRO Commission project

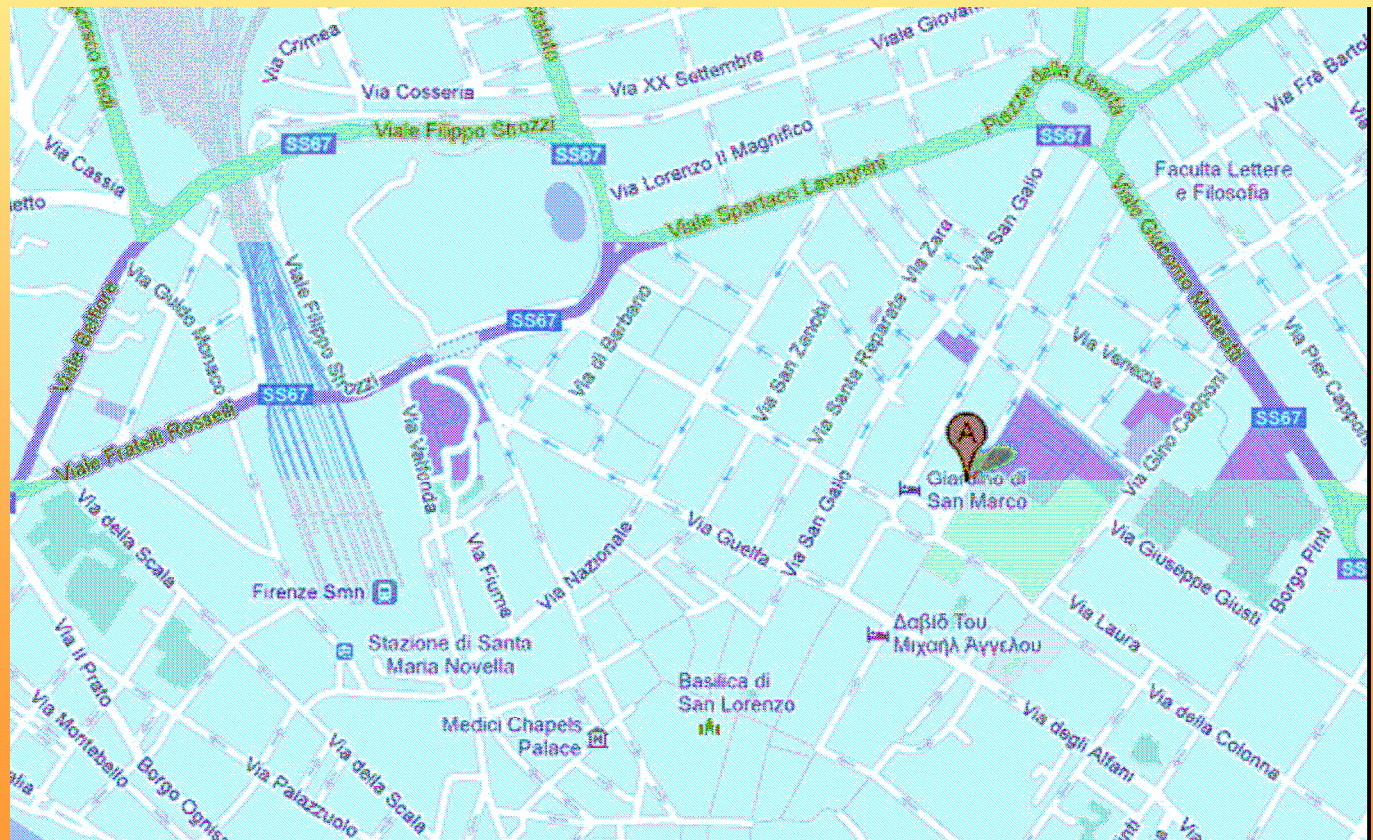

AEOMED

Loess occurrences and dust additions to current surface soils and palaeosols in Mediterranean climate

The workshop is supported by INQUA and IUSS, and it is free for participants. Scientific contributions are welcome. AEOMED project foresees publication of a special issue of *Quaternary International*
